Go Basic

Small presentation about pill
by Wojtek Poninski

Task organization

My task organization is depend of project documentation.
I start from local server then i make routings and i handle functions to each endpoint.

Theoretical Part

Theoretical part i was making by practice and testing because in this way I can learn more.

Knowledge

I learn how to create simple local server with routing and handling http endpoints.

Difficulties

Difficult was understand syntax of golang is different, than languages what I know.

What conclusions do you draw from Go

Is difficult to say something about conclusions.I didn't work enough with this language.

In which cases do you recommend its use.

I recommended use it to create big applications because language go is super fast.
